

TYPE C PACKOFF

ASSEMBLY DESCRIPTION

B & T manufactures the following components compatible with the Type C Packoff:

- A) TYPE C UPPER BRASS
- B) TYPE C LINE WIPER
- C) TYPE C LOWER BRASS

B & T produces Type C components from high quality machined brass which gives them superior wear characteristics. Our brass components also cover a range of common line sizes giving the user maximum flexibility while lowering the amount of inventory that must be kept on hand.

The Type C Line Wiper is available in the full range of materials offered by B & T. Please consult the Elastomer Chart to find the proper compound for your specific application. The standard compound suitable for most applications is SBR/Natural 50. If a slightly harder rubber is desired with the same chemical characteristics, we recommend the standard NBR 60 material.

PLEASE NOTE: Many parts for the Type C, Type CL, MT, and 410 injection heads are shared between different styles, part numbers are listed for each style to avoid confusion. To check cross compatibility, please see the Cross Compatibility Chart.
